Dear Mr. Pape:

At your request, we have examined our records for an area 15 miles in radius centered one mile west of Thayer, Illinois for any public groundwater supplies. The following is a list by county of the public water supplies we found, along with their average daily water use and the approximate location of their source. We also have plotted the location of these water supplies on copies of 1:250000 U.S.G.S. 2 degree maps of this area. Some of the newer reservoirs used as sources for these supplies do not show up on these older maps. However, the locations where they presently exist are circled.

**Christian County**

The southwestern end of Lake Kincaid is included in the area of interest. This lake supplies water for several communities, water districts and an electric power plant.
